

Final Production GO Report

Generated: 2026-05-07T23:26:39Z

Executive Decision

Final Result: PARTIAL GO, not 100%.

Agent Zero is live through authenticated Mission Control test-chat, Playwright MCP is GO for local-only read-only browser automation, Gateway / Agent Hub APIs are protected and loading, Mission Control report links work, and the full Mission Control test suite passed. The release cannot be called GO or 100% because production restart, owner-authenticated visual proof, Hermes live adapter, Firecrawl, YouTube transcript connector, Paperclip owner session, external delivery connectors, and OpenClaw+ doctor health still have exact blockers.

Current Production State

Field	Value
---	---
Branch	`to-knowledge-mc`
HEAD before final report commit	`e56383c`
mission-control.service	`active`
MainPID	`2121865`
ActiveEnterTimestamp	`Thu 2026-05-07 18:15:50 EDT`
claudeclaw.service	`active`
hermes-gateway.service	`active`
Build-Wiki/Farmer timer (`opencloud-docs-farmer.timer`)	`active`
Build-Wiki/Farmer service (`opencloud-docs-farmer.service`)	`inactive`
Agent Zero container	`agent-zero Up 21 hours`

Percentages

System	Decision	Percent	Basis
---	---	---	---
Agent Zero	`PARTIAL GO`	90%	Authenticated status/test-chat pass with agent_zero_called:true; full GO still waits on production restart/owner browser proof/delivery connectors.
Hermes	`NO-GO live`	42%	Service/status healthy, but POST test-chat returns safe 503 with hermes_safe_live_chat_adapter_not_configured.
Gateway / Agent Hub	`PARTIAL GO`	74%	APIs and auth pass; owner-authenticated visual proof remains blocked.
Playwright MCP	`GO local-only read-only`	90%	Local-only status/smoke route passes; interactive/authenticated browser actions remain Bridge Session gated.
SpaceAgent	`PARTIAL GO`	66%	Browser automation is connected through Playwright MCP; Firecrawl and YouTube are blocked/limited.

Firecrawl	`BLOCKED`	25%	Credential/backend missing: firecrawl_credential_required.
YouTube Research	`LIMITED`	45%	Transcript connector not proven; no fake transcript claims.
Paperclip	`PARTIAL / DEGRADED`	45%	Sandbox health works; owner login/session bridge and task views blocked.
Pi Dispatcher	`PENDING / SHADOW`	35%	Dispatcher model/tests exist; live Pi runtime is not proven as authoritative.
OpenClaw+	`PARTIAL / UNHEALTHY`	62%	Runtime service active and one permission issue repaired; doctor still reports auth/plugin/state issues.
Mini-agent workflow	`PARTIAL GO`	68%	Contracts and gauntlets pass; live execution remains Bridge Session gated.
Delivery	`PARTIAL GO`	45%	Mission Control report links work; Telegram, AgentMail, Drive, and OneDrive are blocked/gated.
Bridge Session	`PARTIAL GO`	60%	Policy/tests pass; no active execution session was opened for external writes.
Build-Wiki / Farmer	`PARTIAL GO`	64%	Timer active; Run Now remains scoped to legacy opencloud-docs-farmer.service and requires Bridge Session.
Overall ecosystem	`PARTIAL GO`	87%	Core route/test foundation is strong, but live Hermes, admin restart, owner visual proof, connector credentials, delivery adapters, and OpenClaw+ doctor remain blockers.

Phase Results

Phase	Result	Proof / blocker	Commit
Phase 1	`BLOCKED`	Mission Control restart blocked by admin authentication; service active but PID/timestamp unchanged.	`75deaa6`
Phase 2	`BLOCKED / PARTIAL`	Owner-auth browser visual proof blocked; API truth passes.	`721fe8e`
Phase 3	`BLOCKED`	Hermes live adapter not configured; safe 503 returned.	`025a7e5`
Phase 4	`PARTIAL`	Agent Zero -> Hermes planning contract works; independent Hermes live adapter still blocked.	`4441c70`
Phase 5	`BLOCKED`	Firecrawl credential/backend missing.	`dffd4b`
Phase 6	`LIMITED / BLOCKED`	YouTube transcript connector not proven.	`c155d95`
Phase 7	`PARTIAL / DEGRADED`	Paperclip health works; owner login/session bridge blocked.	`f83bb35`
Phase 8	`BLOCKED`	Paperclip Codex/Claude smokes blocked by Paperclip session bridge; auth separation maintained.	`6d6ba7c`
Phase 9	`PARTIAL`	OpenClaw+ config permission fixed; doctor still unhealthy.	`25fea1c`
Phase 10	`PARTIAL GO`	Mission Control report links work; external delivery blocked/gated.	`e56383c`
Phase 11	`PARTIAL GO`	Typecheck, build, tests, route smoke, services, auth regression passed; release remains PARTIAL GO.	`this report`

Validation Passed

- Mission Control `pnpm run typecheck` passed under Node v24.14.1.
- Mission Control `pnpm run build` passed and produced Gateway / Agent Hub / SpaceAgent / Playwright MCP routes.
- Mission Control `pnpm test` passed: 133 test files, 1,237 tests.

- Agent Zero 10,000-scenario ecosystem gauntlet passed with zero failures.
- Paperclip 1,000-scenario routing gauntlet passed with zero failures.
- SpaceAgent gauntlets passed, including no-secret, no-fake-access, and no-unauthorized-execution coverage.
- Gateway unauthenticated route regression returned 401 for protected API routes.
- Production route smoke confirms Agent Zero `agent\_zero\_called:true` and Hermes safe blocker behavior.
- No external writes were executed.

Route Smoke

| Route | Auth | HTTP | Key result |

| --- | --- | ---: | --- |

| `GET /api/gateway/status` | yes | 200 | ok=True, mode=gateway_status_read_only, status=degraded, execution_enabled=False, writes_enabled=False |

| `GET /api/gateway/agent-hub/status` | yes | 200 | ok=True, mode=gateway_agent_hub_status_read_only, execution_enabled=False, writes_enabled=False |

| `GET /api/gateway/agent-hub/agents` | yes | 200 | ok=True, mode=gateway_agent_hub_agents_read_only, execution_enabled=False, writes_enabled=False |

| `GET /api/gateway/space-agent/browser/status` | yes | 200 | ok=True, mode=space_agent_browser_automation_truth, execution_enabled=False, writes_enabled=False |

| `GET /api/bridge/playwright-mcp/status` | yes | 200 | ok=True, mode=playwright_mcp_status, status=connected, blocker=None, execution_enabled=False, writes_enabled=False |

| `POST /api/bridge/playwright-mcp/smoke` | yes | 200 | ok=True, mode=playwright_mcp_mission_control_smoke, status=passed, blocker=None, execution_enabled=False, writes_enabled=False |

| `GET /api/bridge/agent-zero/status` | yes | 200 | ok=True, mode=agent_zero_commander_status_bridge_session_execution |

| `POST /api/bridge/agent-zero/test-chat` | yes | 200 | ok=True, mode=agent_zero_read_only_test_chat, status=200, agent_zero_called=True, blocker=None, execution_enabled=False, writes_enabled=False |

| `GET /api/bridge/hermes/status` | yes | 200 | ok=True, mode=hermes_lieutenant_status_read_only, blocker=None, execution_enabled=False |

| `POST /api/bridge/hermes/test-chat` | yes | 503 | ok=False, mode=hermes_read_only_test_chat, status=503, hermes_called=False, blocker=hermes_safe_live_chat_adapter_not_configured, execution_enabled=False, writes_enabled=False |

| `GET /api/firecrawl/status` | yes | 200 | ok=True, status=credential_required |

| `GET /api/bridge/paperclip/status` | yes | 200 | ok=True, mode=paperclip_status_read_only, blocker=paperclip_auth_required_or_not_configured, execution_enabled=False, writes_enabled=False |

| `GET /api/bridge/agent-zero/reports` | yes | 200 | ok=True, mode=agent_zero_report_delivery_surface |

| `GET /api/openclaw/doctor` | yes | 200 | json payload |

| `GET /api/gateway/status` | no | 401 | Unauthorized |

| `GET /api/gateway/agent-hub/status` | no | 401 | Unauthorized |

| `GET /api/gateway/agent-hub/agents` | no | 401 | Unauthorized |

| `GET /api/gateway/space-agent/browser/status` | no | 401 | Unauthorized |

| `GET /api/bridge/playwright-mcp/status` | no | 401 | Unauthorized |

| `POST /api/bridge/playwright-mcp/smoke` | no | 401 | Unauthorized |

`GET /api/bridge/agent-zero/status`	no	401	Unauthorized
`POST /api/bridge/agent-zero/test-chat`	no	401	Unauthorized
`GET /api/bridge/hermes/status`	no	401	Unauthorized
`POST /api/bridge/hermes/test-chat`	no	401	Unauthorized

Open Blockers

- `mission\_control\_admin\_restart\_required`
- `owner\_authenticated\_browser\_session\_required`
- `hermes\_safe\_live\_chat\_adapter\_not\_configured`
- `firecrawl\_credential\_required`
- `youtube\_transcript\_connector\_not\_proven`
- `paperclip\_auth\_required\_or\_not\_configured`
- `paperclip\_safe\_test\_task\_adapter\_not\_configured`
- `google\_drive\_upload\_connector\_not\_configured`
- `onedrive\_upload\_connector\_not\_configured`
- `no\_approved\_telegram\_document\_attachment\_route`
- `agentmail\_provider\_not\_visible\_or\_configured`
- `openclaw\_doctor\_remaining\_auth\_plugin\_state\_issues`

What Is Live

- Agent Zero authenticated status and read-only test-chat.
- Gateway / Agent Hub read-only APIs and authentication protection.
- Playwright MCP local-only read-only browser automation status/smoke.
- Mission Control report link surface.
- Paperclip sandbox health endpoint only, not owner session bridge.
- Build-Wiki/Farmer timer visibility under OpenClaw+ naming.

What Is Blocked / Pending

- Admin restart is still required before claiming the latest pushed code is loaded by the production process.
- Owner-authenticated browser visual proof needs an owner session; Codex did not touch session cookies.
- Hermes needs a real no-tool/no-write live adapter before `hermes\_called:true` can count as live.
- Firecrawl needs a protected credential source and read-only adapter smoke.
- YouTube needs a real transcript connector with transcript-backed evidence.
- Paperclip needs owner login/session bridge and read-only company/agent/task views.
- OpenClaw+ doctor needs targeted auth/plugin/state repairs beyond the permission fix already applied.
- Telegram attachment, AgentMail, Google Drive, and OneDrive need configured adapters and Bridge Session proof.

Commits Pushed

- ``e56383c docs(delivery): record connector proof and blockers``
- ``25fea1c docs(openclaw): record health repair status``

- ``14a2972 docs(gateway): record pi shadow dispatcher proof``
- ``c52cf97 docs(paperclip): record coworker dry-run proof``

Rollback Commands

Use one revert per pushed phase commit so unrelated work stays isolated:

- ``git revert e56383c``
- ``git revert 25fea1c``
- ``git revert 6d6ba7c``

- ``git revert f83bb35``
- ``git revert c155d95``
- ``git revert dfffd4b``
- ``git revert 4441c70``
- ``git revert 025a7e5``
- ``git revert 721fe8e``
- ``git revert 75deaa6``

• For the OpenClaw+ config permission repair only, rollback would be ``chmod 644`` on the OpenClaw+ config file, but that is not recommended because it would reintroduce the doctor security warning.

Dirty Tree

Remaining dirty items are parked artifacts and the final report before commit:

- ``?? public/Voice-Biometrics-Executive-Report.pdf``
- ``?? public/lu-ai-collab-v2.mp4``

No-Secrets Confirmation

- No secrets, tokens, API keys, auth files, or ``.env`` values were printed in owner-facing reports.
- No ``.env`` file was modified or staged.
- Staged report diffs were scanned before each commit.
- No external writes, Zapier writes, HeyGen generation, SMB/Fork 2, or farmer execution occurred.
- OpenClaw+ naming is used correctly; the legacy ``opencloud-docs-farmer.service`` name appears only as a literal systemd unit.

Exact Next Step

First, perform the admin-authenticated Mission Control restart and owner-authenticated browser visual proof. Second, implement the safe Hermes no-tool/no-write live adapter. Third, configure one connector at a time: Firecrawl, YouTube transcript, Paperclip owner session, then delivery adapters.
